

ESTUDIO DE PERSONA

E S T U D I O P E R S O N A

Estudio Persona was created by Emiliana Gonzalez and Jessie Young in 2015. Born in Uruguay, they both met in Los Angeles where they started working on a collaborative process that evolved into the formation of Estudio Persona. The unconventional designs follow strong lines combined with a distinctively neutral and minimal approach working with natural materials in contrasting ways, they embody a unique and ever evolving practice that is evident in their feminine lines and sculptural shapes. With a huge respect for traditional craftsmanship, they collaborate with local manufacturers and challenge their designs by adapting to the constraints they encounter with each material they work with.

hilo

Hilo is a family of pieces that communicate with each other, composed of a Sofa, arm-chair, coffee table, and cabinet. Hilo intends to show the unity of two or more elements together. The line work explores the interdependency of various elements – a balance of Intermission and continuity that aims to create tension between shapes and materials, using a void space to freely let the mind connect the pieces.

connection

Connection is a series of objects that seeks a dialogue between volumes and that intersects with an exercise of subtraction and repetition the shapes within a space, trying to find a balance between the graphic impact of the collection and the voluminous objects that compose it.

vol. 1

Volume 1 is an exploration between functionality and sculpture, product and narrative, in order to create furniture that speaks both to space and to the body.

segment

A series of pieces that intent to break down a homogenous piece and bare the question of how to produce several products composed of segments that have a similar understanding between each other.

flow

The flow series looks for light in a dark space or softness in harsh materials, eluding a consistent aura of movement with its folding and unfolding sculptures. The range is comprised of a sofa, stool, table, and lighting that all endure its own movement of formation and shadows played by shape and color.
